

BUSINESS RECOGNITION PROGRAM TERMS & CONDITIONS

To be eligible for certification Applicant must be an IRWD commercial, industrial, institutional, or commercial landscape irrigation customer and responsible for the water consumption at the site which is the subject of this application.

Applicant agrees to schedule and coordinate participation of business personnel in a site assessment to provide access to the site and its water-using hardware equipment, water consumption information (sub-meter readings, flow and/or usage rates) for evaluation by District staff.

Applicant agrees to display and/or associate the WaterStar logo only with a WaterStar certified facility or site and to adhere to the WaterStar logo usage guidelines.

Applicant expressly agrees that IRWD may inspect all properties participation in the WaterStar Certification and Recognition program; that IRWD does not guarantee that WaterStar Business Certification award will result in lower energy bills or water bills; and that IRWD does not warrant any water saving hardware, fixture, or equipment installation to be free of defects or the quality of workmanship, or the suitability of the premises for the installation. Applicant further agrees to defend, indemnify and hold harmless IRWD, its directors, officers, agents and employees, from and against any loss, damage, expense, claims suits and liability, including attorney's fees arising out of or in any way connected with the certification, program, or any water saving hardware, fixture, or equipment of applicant, or its (their) installation. IRWD reserves the right to add or modify certification criteria or change the terms of eligibility at any time.

WaterStar Certification will be issued at the sole discretion of IRWD and for individual facilities and sites that meet the WaterStar Business Certification Criteria. This program, the certification criteria and the terms are subject to change or termination by IRWD without prior notice. Certification will be valid for three years from the date of issuance. Certification may be re-evaluated at the discretion of IRWD any time if metered water consumption and site conditions indicate water waste or if criteria are not continually met.
